

Test Bowie-Dick

Cf. 20 test - Test of Bowie-Dick

**Product codes:**

Reference: 64 910 9691

Product gallery:**Product description:**

The test of Bowie-Dick is a technique to check periodically the proper functioning of an autoclave. This test allows to verify the capacity of air removal and steam penetration into the load that determines the efficacy of the sterilization process.

The chemical indicator inside the pack ready disposable contains appropriate areas suitable for the establishment, by the operator, of the data relating to the test (date, operator, autoclave, result), which can then be stored, in accordance with the current regulations.

Conform to ISO 11140-1 (class 2) and tested according to ISO 11140-4

Dim. 130x100x17mm

Conf. 20 test

Product features:

NDC - TYPE: test Bowie-Dick

NDC - APPLICATIONS: test sterilization

NDC - FORMAT: pack ready disposable

NDC - SIZE: mm130 x 100 x 17

NDC - COMPLIANCE: ISO 11140-1 (classe2)
