Product description:

Cryotube polypropylene autoclavable for the preservation of biological material up to temperatures of -196 °C (-320 °F). Available with either a cylindrical bottom with a base suitable to fit in the workstation and the consequent easy and fast screwing of the cap with one hand. The cap of the new concept has a star shape designed for use with capping machines. Caps with internal thread with gasket rubber injected directly during the production which guarantees the absolute safety, avoiding any possible contamination and loss of liquids. Model without serigraph, non-graduated, without barcode. Cap not assembled, the package comes with caps in bags part

Product features:

CRS - AUTOCLAVABLE: you
CRS - TYPE: internal thread
CRS - CAPACITY MAX: 2ml
CRS - TEMPERATURE MINIMUM: -196°C
CRS - SELF STANDING: you
CRS - CAP: star
CRS - CAP: with gasket
CRS - PURITY: non-hemolytic
CRS - PURITY: non-cytotoxic
