

# criotubi external thread, 2 ml, PP silk-screen printed with basic sterile

criotubi phil. EC external Ø 12.5 x 49 2-ml PP-screened with the stopper inserted with the base sterile - bags of 50 pieces Cf.500pcs

**Product codes:**

Reference: 64 854 9091

**Product gallery:****Product description:**

Cryotube polypropylene autoclavable for the preservation of biological material up to temperatures of -196 °C (-320 °F). Available with either a cylindrical bottom with a base suitable to fit in the workstation and the consequent easy and fast screwing of the cap with one hand. Large writing area white for the identification of the sample and graduated scale silk-screened on the tube. Bar code of type CODE 128 printed directly on the tubes ideal for processing and the automatic storage of the samples may be read with the most common readers of barcode. The cap of the new concept has a star shape designed for use with capping machines. Caps with external thread with seal in rubber injected directly during the production which guarantees the absolute safety, avoiding any possible contamination and loss of liquids. The devices are free of human DNA Dnase Rnase ATP, PCR inhibitors, and Apirogeni. Non-cytotoxic non-hemolytic.

---

**Product features:**

CRS - AUTOCLAVABLE: you  
CRS - TYPE: external thread  
CRS - CAPACITY MAX: 2ml  
CRS - TEMPERATURE MINIMUM: -196°C  
CRS - SELF STANDING: you  
CRS - CAP: star  
CRS - CAP: with gasket  
CRS - PURITY: DNA, RNA, DNase, RNase FREE  
CRS - PURITY: DNA  
CRS - PURITY: non-hemolytic  
CRS - PURITY: non-cytotoxic  
CRS - PURITY: pyrogen FREE  
CRS - PURITY: inhibitors PCR FREE  
CRS - PURITY: DNase, RNase FREE  
CRS - STERILITY: you  
CRS - HEIGHT: 46mm  
CRS - DIAMETER: 12.50mm  
CRS - AREA WRITABLE: you  
CRS - SIZED: you  
CRS - MATERIAL: PP  
CRS - SUITABLE FOR: freezing  
CRS - SUITABLE FOR: sampling  
CRS - SUITABLE FOR: storage  
CRS - SUITABLE FOR: cryogenics  
CRS - TRACEABILITY: bar code side  
CRS - FUND: round
