## Product description:

CUVETTES FOR SPECTROPHOTOMETER. Cuvette disposable macro and semi-micro spectrophotometry, 2-sided optical optical path 10mm. PS optical ensures optimum transmission from 340 to 800 nm and in PMMA UV grade from 280-800nm. The variations of the absorption are contained in the 1% condition is extremely important, especially for the analysis in series. Packed in the stands with the cover in styrofoam 100pcs dust proof.

## Product features:

CVT - TYPE: cuvette disposable  
CVT - READING: UV  
CVT - WAVELENGTH: 280-800nm  
CVT - MATERIAL: PMMA  
CVT - CAPACITY MAX: 4.0ml  
CVT - OPTICAL PATH: 10mm  
CVT - No FACES OPTICAL: 2  
CVT - COMPATIBILITY: spectrophotometer standard  
CVT - SIZE: 10x10X45mm  
CVT - FORM: macro  
CVT - COMPLIANCE: CE

Shop name

---

CVT - OPTIONAL ACCESSORIES: caps

CVT - APPLICATIONS: spectrophotometry

CVT - MAIN FEATURES: cuvette disposable macro from 280 to 800nm
