Product gallery:**Product description:**

Hypodermic needles in STAINLESS steel AISI 304, thanks to the silicone sealing and triple sharpening in accordance with ISO 7864, guarantee an excellent penetration while ensuring minimal trauma during penetration. Each element of the needle, is treated in a specific way for painless injection. The needles fit the cone Luer 6 % (ISO 594/1) or the cone Luer 6 % (ISO 594/2). The barrel color permits to identify the diameter of the needle. The wide range allows the use for every need. Sterile in single packaging, disposable, non-toxic, apyrogenic, latex free to avoid any allergies.

Product features:
