Product description:

Needles butterfly - microperfusori. The needles epicranici is made up of a cannula into a vein two fins, a tube equipped with a terminal connector with cap Luer/Lock screw-on suitable therapies and intravenous (iv) intermittent. Lake triple sharpening allows you to realize uniniezione painless. The fins are soft, allow a secure grip, facilitating fixing. Color codes to identify the diameter of the needles (diameter dellago indicated on the wings). Also available with safety device. The safety device (protector of the cannula) has the function of preventing needlestick injuries. Through a simple slip of the fins, the lake recedes and is neutralised within the protection device. Sterile in single packaging, disposable, non-toxic apirogeni latex free to avoid any allergies
