Product description:

ANSE STERILE CALIBRATED EMBEDDING NEEDLE + BALL. Loops for inocula in microbiological (needles disposable inoculation) with needle + ball. Type a flexible, soft, made of crystal polystyrene (PS) shockproof (blue in colour). The ball tip allows the execution of a perfect smear with a single unit. Suitable for land that is solid, semisolid, liquid or nutrient jellies. Lugs suitable for inoculating soils solidified in a test tube. The lake allows you to insert the cells along a vertical line and depth to permit the development of anaerobic bacteria and facilitating the observation of mobile forms that spread from the line dellinoculo. Surface ultralevigata for an easy to smear and to prevent damage to dellAgar. Handle simple and ergonomic. These loops do not have residues of lubricants, oils and electrostatic charges coming from the production process. Sterile in packs of 20 pieces. Device Latex free.

Product features:
