Product description:

Rings for inclusion

Rings for inclusion in ABS are very resistant to heat and high compression.

Can be mounted on any type of microtome thanks to the possibility to obtain paraffin blocks uniform

For easier identification and classification are available in various colors.

Dim. 28 x 40.7 x 11mm

Product features:

CNT - TYPE: rings inclusion

THE CNT MATERIAL: ABS

CNT - FORM: standard

CNT - DIMENSIONS: 28x40.7x11mm

CNT - COMPLIANCE: EC

CNT - MAIN FEATURES: rings of inclusion in ABS compatible with any type of microtome

CNT - SUITABLE FOR: pathological anatomy

CNT - RESISTANCE: heat
