Product description:

Homogenizers

Mortars made of borosilicate glass, for use with a special piston in PTFE.

The gap between the mortar and the piston varies from 0.15 to 0.25 mm.

Constituted in such a way as to avoid overheating that can degrade the tissue to homogenize.

Designed to avoid damage to the cell nuclei.

Pistons not included

Product features:

CNT - TYPE: mortar

CNT - CAPACITY MAX: 2ml

THE CNT MATERIAL: borosilicate glass

CNT - FORM: cylindrical

CNT - COVER: without

CNT - COMPATIBILITY: piston homogenization

CNT - DIMENSIONS: Ø120/8mm

CNT - OPTIONAL ACCESSORIES: piston homogenization

CNT - MAIN FEATURES: mortars of glass to be used with the appropriate pistons. Designed to avoid damage to the cell nuclei

CNT - SUITABLE FOR: homogenization

CNT - STERILE: no

CNT - GRADUATED: no
