Product description:

Questi puntali da 1000µl sono più lunghi rispetto ai soliti per permettere di raggiungere anche il fondo dei microtubi o di pozzetti abbastanza profondi. Il cono FlexTop (consistente in un cono più morbido e flessibile) permette la massima compatibilità e aderenza con le pipette in commercio, mentre la punta UltraFine (consistenze in una punta più flessibile per aderire perfettamente alle pareti del contenitore in fase di dispensazione) permette di dispensare accuratamente fino all'ultima goccia di campione.
